

Watsons COVID-19 Statement

The Housing Market remains open and operational during Plan B following the rapid spread of the Omicron variant in the UK.

This means that we can continue arranging viewings with interested buyers, [valuations](#), [home surveys](#), [inspections](#) and other necessary property visits, in line with the Government's sector-specific guidance issued by the Prime Minister, Boris Johnson on 8 December 2021.

The Government urges all involved in to continue with good hygiene practices, which includes regular washing of hands, sanitising and the wearing face masks. These measures will assist in preventing the spread of infection.

All of our staff follow the specific guidance issued and continue to wear face masks and sanitise prior to entering any home for an inspection or viewing. We request you do the same where possible to prevent the spread of infection further.

As we move into this next stage of the pandemic it's important we all continue to think of others at all times. We will update our industry guidance as changes to restrictions unfold.

Please contact us if you have any specific questions or need some further guidance. We are here for you, Monday to Friday, 9am - 5.30pm:
